

US \$549.- Straight Track Kit

US \$649.- Curved track Kit

Indie Dolly Track

The Indie Dolly Track is made of high grade anodized aluminium. It connects with precision machined Dowel Pins that are made to fit in the track-ends at a tolerance of +/- .001"

Custom made Velcro straps keep the sections from sliding apart (see Demo Video)

The Straight track kit as well as the curved track kit come in sections of four. Each Straight track section is 3 feet long. The total length of a straight track kit is 12 feet. The total length of a curved track kit is about 13 feet. It is a quarter of a 20 foot diameter circle, therefore you would need 4 Curved track kits or 16 sections of individual sections in order to complete a full circle.

The Indie Dolly Track comes with black support-blocks that need to be placed under every track joint. You should also place a support-block in the middle of each track-section.

Indie Dolly Curved Track

Black Support-Blocks

The Indie Dolly Track comes in custom carry cases.
